

## Eel Paper Craft

### Kids Paper Craft

#### List of Supplies:

1. Colored craft papers
2. Googly eyes
3. Pencil
4. Scissors
5. Glue

#### Instructions:

##### Step -1:

Select at least 2 shades of colored craft papers for this craft. The template for the eel fish craft includes 3 patterns, main body, fin and outer fin base. Trace the fin and fin base on the same colored paper and trace the main body on a different colored paper. Cut out the traced patterns using a pair of scissors.

##### Step -2:

Attach the main body pattern on the outer fin base pattern by making sure that the fin base is visible on both sides even under the body pattern.

##### Step - 3:

Attach the small fin near the head part of the paper eel fish.

##### Step - 4:

Attach the googly eyes on the head part.

##### Step - 5:

Use a black gel pen or marker to trace a smiley face under the googly eyes on the head part of the paper eel. You can add some striped patterns along the fins of both sides of the body; and the small fin as well.
