

## Outer Space Theme Party Bags

### Kids Education Craft

#### List of Supplies:

1. Colored craft papers
2. Satin ribbon
3. Pencil
4. Scissors
5. Craft glue

#### Instructions:

##### Step -1:

Cut a piece of paper to make the paper bag. I prepared mine into 8.5 inches X 5 inches.

##### Step -2:

Fold the 8 inches part into half, leaving the 0.5 inch part. Fold the 0.5 inch towards the inside and glue it with the other end of the folded paper.

##### Step - 3:

Fold up about 2 inches of the paper from either open ends.

##### Step - 4:

Open up the folded-up part and flatten its 2 corners with the rest of the paper. This will form 2 flap-like shapes on top and bottom side.

##### Step - 5:

Grab the top flap and fold it towards the middle line (crease) on the bottom side.

##### Step - 6:

Similarly, fold up the bottom flap and overlap it with the top flap. Apply glue on the overlapped parts to secure the bottom end of the paper bag.

##### Step - 7:

Trace the patterns from the provided template on some colored craft papers. Cut out the traced patterns nicely.

##### Step - 8:

Assemble the patterns to form the rocket (planet, UFO). Apply glue to attach the parts.

Step - 9:

Attach the paper rocket on the paper bag. Stick some star cutouts on the bag as well.

Step - 10:

Cut out 2 small pieces of ribbons and attach them on the top open end of the bag for the handles.
